

Dry and Wet Riser

Keeping the art of distribution simple

Dry and Wet Riser

Leading the Way.

As the UK's market leading Fire Protection distributor we offer a wide product range including; Thin Wall Riser Tube, dry and wet riser cabinets, flow switches, wet riser valves, valves, tubes, bracketry and fittings. Working closely with premium brands all components comply with BS5041, BS5306, BS990 & building approval regulations.

Committed to making the supply chain more transparent we retain full control of all of our products chain of custody, which means we know who has what, when and where.

Unrivalled Customer Service.

Our teams are experienced in liaising with engineers and on-site personnel on a daily basis. Offering solutions based on their knowledge and understanding of the market, products, and customers, they will find the correct solution for your needs.

We deliver products from our 5 nationwide branches so your order is fulfilled from your closest branch, using our own vehicles and delivered to you the next day.

Heavy, Medium and Thin Wall (70 Bar) Galvanised Riser Tube

Shawston Riser Tubes are fully test certified, copies can be provided to customers and their clients. All tubes are pre-grooved at both ends saving you both installation time AND on-site grooving costs. Working with the premium brand Victaulic, the Shawston Thin Wall Riser Tube pre-groove is audited and rigorously tested in-house assuring the customer that all their QS necessities are met.

At 40% lighter as well as being less expensive than the usual “heavy” steel riser tube, the Shawston Thin Wall Riser Tube allows a single operative to carry a 3m length of thin wall riser pipe, whereas two are required for traditional heavy weight. The substantial weight saving and ease of manual handling also means contractors can collect tube and fit approximately 40% more tube volume in their panel van - meaning more time on-site installing and less time having to remove or to cut a shift short.

Wet Riser Pressure Reducing Valves

A well-engineered wet riser pressure reducing valve with several advantages over other UK brands:

- » **Higher grade of rubber gasket, no leaks on commissioning (subject to T&C's of sale).**
- » **No lost time re-visiting drips/leaks - no labour recalls.**
- » **Product is stocked in-depth at Shawston's nationwide depots for just-in-time delivery to site.**
- » **Fully traceable chain of custody back to Shawston partner manufacturer.**

Shawston also carry the full range of dry and wet riser cabinets, valves and accessories making Shawston **THE ONLY** national multi depot supplier of dry and wet riser packages in the UK.

WET RISER PRESSURE REDUCING VALVE

The HV024 bib-nosed pattern high pressure regulating landing valve is designed to provide a range of outlet pressure (4-12 bar).

The design and construction of the landing valves is in accordance with BS5041-1 and the requirements of BS9990: 2015.

The valve is suitable for connection of a high-pressure water supply of up to 25 bar (362 psi). Each valve is hydrostatically pressure tested to 25 bar and 30 bar.

The PRV has been developed long term by our partner manufacturer specifically for the UK High Rise market incorporating new innovation to ensure a quality, reliable and safe solution that conforms with the requirements of today's High Rise Firefighting legislation and challenges.

The PRV is offered with a number of approvals as required such as DNV, FM and CE.

CODE	Description	Approx. Weight (kg)

Dry and Wet Riser Cabinets

All our cabinets are manufactured to the current British Standards BS5041/BS9990 and are available in two finishes.

FEATURES & BENEFITS INCLUDE:

- High Grade Stainless Steel - less likely to corrode.
- Red with UV protection - high resistance to fading in sunlight.
- Ready to fit. Saving you time at the installation stage.
- Polished generic locks.
- Bespoke service available. (Quote to Spec only)
- 5 year warranty.
- Full range of spares ex-stock.
